

## LASER Fume Extraction Solutions

# AD GoldSEAL RS

Advantage

The **complete solution** for the extraction, filtration and recovery of **precious metals**.

The AD GoldSEAL RS is a dust extraction system designed for the jewellery industry that recovers and collects precious metals.

The metal particles are collected in an easy to remove tray and the HEPA filter can be incinerated to reveal the precious metal collected in the filtration process.

Automatic Flow Control allows the user to preset correct air flow rates, for lower noise levels and allow further protection of the HEPA filter.
