

Made in the United Kingdom

- Desco Europe waste bags are non-tribocharging and are designed for use in ESD protected areas where electrostatic sensitive devices are present. Even at low humidity they do not become charged with static electricity.
- They are made from high quality polyethylene and are as strong as conventional refuse sacks.
- All sizes are printed with the ESD Protective Symbol per EN 61340-5.

"ESD damage can occur when:

- a charged person or object comes into contact with an ESD sensitive device (ESDS);
- an ESDS comes into direct contact with a highly conductive surface while exposed to an electrostatic field;
- a charged ESDS comes into contact with another conductive surface which is at a different electrical potential. This surface may or may not be grounded."
