RoHS 2 and REACH Compliance Statement

None of the RoHS 2 restricted materials or REACH substances of very high concern as of 2013/06/20 are intentionally added in manufacturing this product.
 Ref: European Union Directive 2011/65/EU and Regulation (EC) No. 1907/2006/CE. See Vermason Limited Warranty at Vermason.co.uk.

“For standing operations, personnel can be grounded via a wrist strap system or by a flooring-footwear system”. [EN 61340-5-1 Edition 1.0 2007-08 clause 5.3.2 Personnel grounding]
 “When the use of a wrist strap system is impractical, the [ESD] floor and [ESD] footwear shall be the primary means of ESD control.” [EN 61340-5-1 clause 5.5 EPA working practices]
 “Heel and toe grounders should be worn on each foot. ... once these are worn outside the EPA, particularly on carpets, they are likely to accumulate fluff and become ineffective; this requires that they be checked or replaced on every visit to the EPA [ESD Protected Area].” [EN 61340-5-2.2008 User guide clause 5.2.8 Footwear]

Description

stat-A-REST™ Foot Grounders are Dissipative Footwear which meet EN 61340-5-1. They are designed to more reliably contact grounded ESD flooring, and provide a continuous path-to-ground to remove electrostatic charges from personnel. stat-A-REST™ are easier to install than most foot grounders, and designed to be used on standard shoes by placing the grounding tab in the shoe under the foot. They are a suitable ESD footwear component in a Person/footwear/flooring system, meeting the EN 61340-5-1 required limits < 1 x 10⁹ ohms and < 100 volts peak body voltage.

Made in the United States of America

Components

- A. Non-Marring Thermoplastic Elastomer (TPE)
- B. 46 cm Conductive 8-Strand Nylon Polyester Grounding Tab

Electrical Properties

Property	Test Method	Value
Resistance:	IEC 61340-2-3	1 x 10 ⁷ to < 1 x 10 ⁸ ohms

See independent test lab report [here](#).

Specifications

Construction: Thermoplastic Elastomer (TPE)
 Colour: Blue
