

ILF 1000

Inline Filter

The BOFA inline pre filter 1000 has been designed specifically for applications that generate high amounts of fine dust or particulate.

This inline filter unit is positioned alongside the main BOFA fume filtration system to increase the overall filter capacity and extend the life of the main filters. The DeepPleat DUO pre-filter incorporates a massive drop-out chamber within the filter, having a volume area of 15ltrs. Above the drop-out chamber but still within the housing there is a sealed 200mm deep pleat layer of F8 media giving a surface area in excess of 30 sq metres.

Inline Filtration System

Laser Process

Inline filter (ILF 1000)

BOFA filtration system

The perfect 'companion' for fume extraction solutions that need a longer life on applications where high amounts of dust and particulate are generated.

STANDARD FEATURES:

- DeepPleat DUO pre filter
- Extended filter life
- Large filtration area
- Filters with long life and low replacement cost

Featuring DeepPleat DUO filter technology

UNIT PART NUMBERS		REPLACEMENT FILTERS - PART NUMBERS	
Model	Part No.	Model	Part No.
ILF 1000 Stainless Steel	A1030307	DeepPleat DUO Pre Filter	A1030222

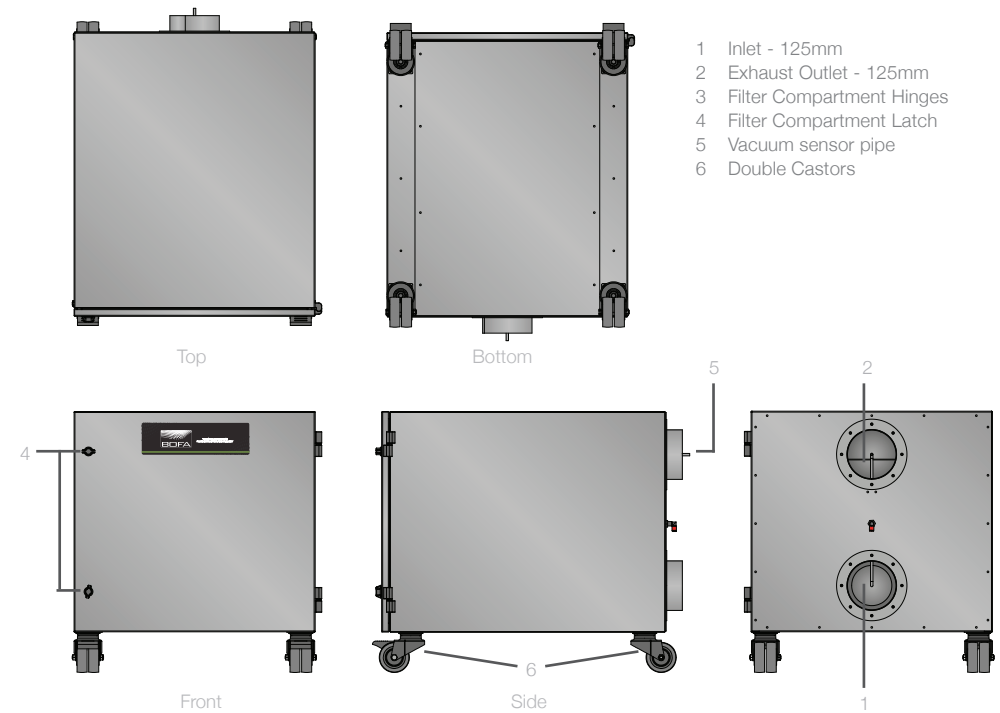

TECHNICAL DATA - ILF 1000		
	EU	US
Dimensions (HxWxD)	647 x 600 x 690 mm	25.5 x 23.6 x 27.2"
Cabinet Construction	Stainless Steel	Stainless Steel
Weight	25kg	55lbs
Exhaust Outlet	125mm	4.9"

DEEPPLEAT DUO PRE FILTER SPECIFICATIONS	
Surface Media Area	30m ² approx
Filter Media	Glass Fibre
Filter Media Construction	Maxi Pleat Construction with Webbing Spacers
Filter Housing	Zintec mild steel
Filter Efficiency	F8 (95% @ 0.9 microns)

AIRFLOW THROUGH FILTERS

TECHNICAL SPECIFICATION

Other hose kits and filters are available. All of the above units are fitted with our standard filter combinations. For specific applications please call us for details. Replacement filters should always be ordered using the part number on the filters inside your extractor to ensure the correct filter is ordered. Datasheet correct at time of print.
