Watermark on back of sheet

Item	Description
<a href="#">91242</a>	Self-Stick Notes - Static Dissipative

*"It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity." [ESD Handbook ESD TR20.20 section 2.4 Sources of Static Electricity]*

Dimensional tolerances are +/- 10% unless otherwise noted

Specifications and procedures subject to change without notice.
